Senior AI Python Developer

Experience: 4-6 yrs

Description

We are seeking an experienced **Python Developer** with **5-6 years** of expertise in **backend development, data science, and ML**. The ideal candidate will design and maintain scalable **backend solutions, RESTful APIs, and third-party integrations** while optimizing performance and security.

Responsibilities

- Design, develop, and maintain efficient, reusable, and reliable Python code.
- Build scalable backend solutions, RESTful APIs, and integrations with third-party services.
- Optimize applications for performance, scalability, and security.
- Collaborate with cross-functional teams, including front-end developers, data scientists, and DevOps engineers.
- Work with databases (SQL & NoSQL) and ensure efficient data storage and retrieval.
- Implement best coding practices, conduct code reviews, and write unit tests.
- Troubleshoot, debug, and upgrade existing applications.
- Stay up-to-date with the latest industry trends, frameworks, and technologies.

Qualifications

- 4-6 years of professional experience in Python development, data science & ML.
- Strong knowledge of frameworks such as Django, Flask, or FastAPI.
- Experience with relational databases (PostgreSQL, MySQL) and NoSQL databases (MongoDB, Redis).
- Proficiency in RESTful API design and development.
- Experience with cloud services such as AWS, Azure, or GCP.
- Familiarity with containerization tools like Docker and orchestration tools like Kubernetes.
- Experience with version control systems such as Git.
- Strong understanding of software development life cycle (SDLC) and Agile methodologies.
